

# THREE FORCES VISION QUEST

27<sup>th</sup> July – 2<sup>nd</sup> August 2026

Einödhof Wildland Farm - bordering the Ötscher Tormäuer Nature Park

**Three days and three nights of being alone and all one in the mountains,  
one with the elements, plants and animals,  
the nature spirits - and with yourself.**

**Meeting yourself in this deep and honest way can spark profound change in your life.** This ancient ritual is a return to pure connection with nature and offers many gifts - whether you are standing at a crossroads, seeking inner clarity, or longing to reconnect with the Divine Source and the hearts of fellow humans.

**What makes the Three Forces Vision Quest unique is its deep grounding in Central European shamanic tradition, allowing us to reconnect with our European roots. The Three Forces Tribe, clear and accessible rituals, local ritual songs, and a supportive, uplifting community spirit foster a strong sense of safety and trust.**

**While you are on the mountain, daily sweat lodges and rituals are held in the base camp in support of your process.** Those remaining at camp hold you through prayer and active service - sweating in ceremony, eating and drinking on your behalf, and strengthening you on all levels. **The ritual fire, carefully tended for the whole three days and nights,** forms a living connection between base camp and mountain, supporting you in your experience and any challenges that arise.

**A vital part of the ceremony is time spent in solitude, in deep connection with nature, accompanied by fasting for three days and nights.** In return, insights into your calling and life may arise in the form of visions and dreams. The flight of birds, the whisper of trees, sunrise and sunset, the stars, moonlight, and intimate contact with Mother Earth and Father Sky begin to fill us completely. We remember that we are part of a greater, universal harmony.

#### **Vision Quest in the mountain forest:**

For the Vision Quest, a vast mountain forest is available to us, directly by the Wildland Farm. This is one of the last resorts of the golden eagle and home to deer, ravens, eagle owls and many rare animals and plants. All this makes for the ideal space for a Vision Quest that will nurture you on the three days and nights you refrain from physical food and open yourself to the experience of being all one.

#### **Community life at base camp:**

We live on the Wildlife Farm with a few beds, a big campsite, a dining room with big kitchen, a bathroom, toilets, a community fireplace and a sweat lodge site with a sweat lodge. During the Vision Quest, we are the only people on the high plateau, allowing for complete silence and seclusion.

**Family and children warmly welcome!**
